VAIDHURYA

VAIDHURYA

AI-Native Marketplace for Jewelry in India

A trusted multi-seller platform for metal, diamond, and gemstone jewelry, personalized through outfit-led AI styling recommendations.

Premium commerce.
Personalized by AI.

Fragmented Market, Personalized Opportunity

India's jewelry market is still trust-heavy, fragmented, and difficult to personalize online.

Buyer Pain

Discovery is inconsistent across metal, diamond, and gemstone categories, and shoppers struggle to match jewelry to outfit, occasion, and budget.

Seller Pain

Independent sellers have limited digital visibility, uneven merchandising, and high customer acquisition friction in a market still led by offline trust.

VAIDHURYA

A trusted multi-seller marketplace that combines premium commerce with AI-led recommendations tailored to dress, style, occasion, and spend.

What Makes VAIDHURYA Agentic

The platform does more than search inventory; it interprets intent and curates the best next action.

Understands

A customer uploads a dress photo and the system reads color, silhouette, neckline, occasion, and aesthetic cues.

Matches

Those signals map to category, metal tone, stone palette, design language, and price band across seller inventory.

Learns

Clicks, saves, purchases, and repeat behavior sharpen recommendations for shoppers while improving marketplace merchandising.

Full-Stack Product Experience

VAIDHURYA connects premium storefront design, multi-seller commerce, and AI styling in one buyer journey.

Seller Onboarding

Sellers register, manage listings, and showcase metal, diamond, and gemstone collections with trust-rich product detail.

Buyer Discovery

Customers browse by category, occasion, material, style, and budget while discovering certified, premium presentation.

AI Styling Flow

Upload a dress photo, receive curated recommendations, compare options, and move into cart, checkout, and order tracking.

Current Traction and Readiness

The company is positioned as an early-stage build with a clear product thesis and fundraising-ready narrative.

MVP

Product concept and premium commerce foundation are already defined.

Product readiness

EARLY

Validation is focused on seller onboarding, buyer experience, and styling fit.

Validation stage

READY

Investor outreach can center on product clarity, AI differentiation, and category timing.

Investor readiness

Built by Founders Focused on Premium Commerce

The founding team is shaping VAIDHURYA at the intersection of jewelry commerce, AI-led personalization, and marketplace execution.

Venkatesha DP

Co-founder driving product vision, marketplace execution, and the customer experience needed to modernize jewelry buying in India.

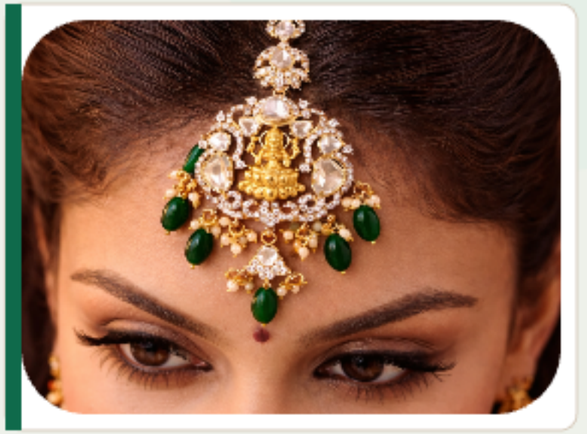

Rishitha Adari

Co-founder shaping brand direction, business build-out, and the premium trust layer needed to attract sellers and shoppers.

Why This Team

Execution-first founders building a trusted commerce brand with AI-native personalization as the product differentiator.

Multiple Monetization Layers

VAIDHURYA is structured to capture transaction revenue, recurring seller revenue, and platform service upside.

Marketplace Take Rate

Commission on every completed transaction across metal, diamond, and gemstone jewelry sold on the platform.

Seller Revenue

Premium storefront plans, merchandising tools, and optional visibility boosts create recurring platform revenue.

Value-Added Services

Catalog support, certification assistance, content creation, and future logistics enablement deepen monetization over time.

Built for Scale with Claude and AWS

The platform combines premium commerce infrastructure with an AI layer designed for personalization and operational leverage.

Commerce Core

Next.js and React power a premium storefront, seller workflows, cart, checkout, tracking, and content-managed merchandising.

Claude + AI

Claude is planned for catalog enrichment, listing assistance, style reasoning, and support workflows around personalization.

AWS Backbone

AWS supports storage, compute, scalability, and orchestration for uploads, media, recommendation flows, and platform operations.

Fundraising Status

Capital will accelerate product development, AI recommendations, seller acquisition, and marketplace launch readiness.

PRE-SEED

Fundraising stage focused on building the category-defining jewelry marketplace.

Open investor conversations

AI + GTM

Primary use of funds across product, recommendation engine, seller onboarding, and customer growth.

Use of funds

V1 LAUNCH

Next milestone: launch with live sellers and an outfit-led recommendation experience.
